

## Here is your latest **OnLine News**

Dear Fleischmann Modeller,

### ***Now in selected dealers!***

For N gauge modellers "Hercules" comes to the rescue!  
A "DispoLok" (rental loco) to haul freight – the environmentally friendly diesel developed for Austrian railways is now hauling commercial freight trains all over European tracks.

**Fleischmann <<piccolo>> model no: 87 7260**

*Equipped with 6-pin decoder socket for DCC operation if desired.*

The Siemens built "DispoLok" ER 20 diesel electric loco "Hercules" is one of the EuroRunner family of locos currently hauling goods wagons throughout Austria and Germany. This model carries the advertising logo for SWR television.

Of course, what all N gauge modellers have been waiting all year for is the dainty Bavarian tank engine number **model no: 7071**

Well, Santa Claus and his elves in Nürnberg have just loaded the sacks into the sleigh so that Rudolph and his gang should get the loco into your local dealer just a few days before Christmas eve!

The elegant class 18.5, another Bavarian original, In DRG livery was already delivered in November. **Model no: 4119**

Whilst the gigantic, class 95 tank engine, with her new 5-pole motor, and 6-pin digital decoder socket, **model no: 4055** Should also be in the same sleighload of new models from Nürnberg!

However, it is with great regret that we have to tell you that although Santa's little elves have been working hard to get all the Christmas orders out to the shops, that our other planned new loco in N gauge <<piccolo>> the V60, will **not** get to the shops in time for Christmas.

model no: 7225

*Wishing you a very  
Happy Christmas  
and a Healthy New Year!*
