

## **FLEISCHMANN Fashions for 2008!**

“Under the spotlight” report from the February 2008 Nürnberg Fashion week!

Emphasising the “Continental” look, the **FLEISCHMANN** catwalk revealed exciting new designs from this famous designer, modelled in two gauges – HO and N, with several stunning designs scheduled to hit the shops throughout 2008.

Highlight of this year’s HO collection – a class 54 model, clothed in traditional black with red underskirting – a new model steam loco whose original design dates back to the 1920,s but given a complete makeover from the **FLEISCHMANN** team. Decoder socket, close-coupling as standard fitting, with of course, directionally co-ordinated headlights! Due in the shops next Winter.

Modelled for the smaller size, this year’s **FLEISCHMANN** N gauge <<piccolo>> boutique offers a unique reflection on the modern look with multi-voltage electric freight locos from the BLS Cargo and Crossrail based on the transalpine routes in Switzerland.

The colour theme for this year has been brought completely up to date with added goods wagons as accessories to the main creations. Behind the scenes, the **FLEISCHMANN** make-up artists have been busy applying the final finish to the vast array of goods wagons for this season’s collection.

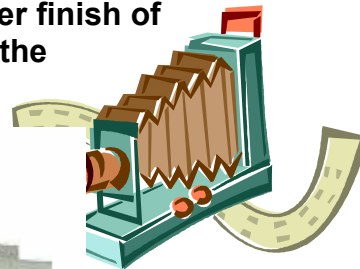

Just one of the colourful wagons of Europe, is the high-capacity, self-unloader hopper wagon of the colourful NIAG train operator of the lower Rhineland.

Style “a la Continent” is back in vogue yet again with the luxury Prussian trains of yesteryear. This year’s models are the attractive 6-wheeled sleeping car and wooden restaurant car of the DSG/DB.

Back to the days of black & white photography, when steam engines leaving the works were painted in an all over finish of photographic grey livery to enhance the details for the photograph – two magnificent “P8” models – HO and N are now available in grey.

But if you want trendy or quirky, then just take a look at the latest offering from this famous stable – dating back in time to 1909, the class Pt 2/3 tank engine looks stunning in original, striking Bavarian green outfit with accompanying white lining.

Available as an exclusive set with her accompanying rake of short wheelbase coaches in matching green Bavarian outfits.

Still designed for the smaller N gauge, first seen in the original wine-red finish, strong and sturdy, this ubiquitous all-rounder shows her paces for 2008 in the unusual black uniform of the loco works at Cottbus.

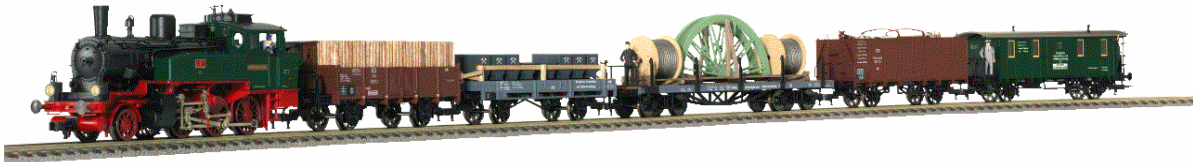

She shunts, pushes and pulls.  
This year’s V 60 <<piccolo>> diesel is in black!  
(yellow auto-coupling only on prototype!)  
[prototype picture]

Still in the N <<piccolo>> style,  
a new loco guaranteed to  
excite Swiss modellers –  
the mighty “Gotthard” loco  
– the Ae 6/6 !

Black is never out of fashion, and you can't get blacker than coal!  
This year's collection finale must be reserved for the black as coal sets  
themed as the “Colliery Train” –

and the “Miner's Luck” – class 91 and ancilliary mining accessory trucks,  
together with an extension set – both in HO gauge only!

This year's “must have” digital accessory just has  
to be the new PROFI-BOSS –  
a digital dcc controller to fit snugly into the hand!  
Trendy – the PROFI-BOSS sets the tone –  
and not just for your Sound locos!  
As well as operating all the trains and functions, just  
one key gives access to the menu for changing points,  
signals etc.  
A dcc controller for the discerning digital modeller.

**THERE'S MUCH MORE to 2008 THAN SHOWN HERE**
